

Data Cleaning & Preparation — Change Log

DECODELABS INDUSTRIAL TRAINING KIT | BATCH 2026

1,200 TOTAL RECORDS	14 COLUMNS AUDITED	0% ID DUPLICATE RATE	ISO 8601 DATE STANDARD
------------------------	-----------------------	-------------------------	---------------------------

1. DATASET SUMMARY

Source File: Dataset_for_Data_Analytics.xlsx
Record Count: 1,200 order records across 14 transactional columns.
Columns Covered: OrderID, Date, CustomerID, Product, Quantity, UnitPrice, ShippingAddress, PaymentMethod, OrderStatus, TrackingNumber, ItemsInCart, CouponCode, ReferralSource, TotalPrice.

2. AUDIT CHECKS PERFORMED

Audit Check Description	Result
Duplicate OrderIDs	0 found
Fully duplicate rows	0 found
Missing values (all columns)	309 missing in CouponCode only
Date format consistency (ISO 8601 parseable)	PASS (all 1,200 rows valid)
TotalPrice = Quantity × UnitPrice	PASS (0 mismatches)
Negative/zero Quantity, UnitPrice, ItemsInCart	0 found
ID format consistency (OrderID, CustomerID, TrackingNumber)	PASS (100% match expected pattern)
Categorical text consistency (Product, PaymentMethod, OrderStatus, ReferralSource)	PASS (no casing/spelling variants found)

3. CHANGES MADE & TRANSFORMATIONS LOG

ID	Field	Action Description	Impact / Rationale	Status
CR001	OrderID	Conducted primary key duplicate audit on OrderID using Conditional Formatting.	Verified 1,200 unique records; confirmed 0% duplicate error rate threshold.	RESOLVED
CR002	CouponCode	Identified 309 null values in CouponCode; imputed missing entries with 'NONE'.	Prevents null value calculation errors during aggregation and filtering.	RESOLVED
CR003	Date	Reformatted all 1,200 date entries in Column B to standard ISO 8601 (YYYY-MM-DD).	Cleared mandatory Verification Gate requirement for Project 2 eligibility.	RESOLVED
CR004	Product	Normalised text values across all string fields using TRIM and PROPER functions.	Eliminated potential leading/trailing whitespace and standardized casing.	RESOLVED
CR005	UnitPrice / TotalPrice	Formatted UnitPrice and TotalPrice to 2 decimal places and validated mathematical parity (Quantity × UnitPrice = TotalPrice).	Ensures financial precision and data integrity across all transaction records.	RESOLVED

✓ Verification Gate Clearance: PASSED

Achieved 0% unique ID duplicate rate and 100% ISO 8601 date compliance. Project 2 unlocked.
